YUNIGREEN AT GLANCE

A Journey from Start to Leadership

Yanbu United Company **(YUNIGREEN)** stands as a leading entity in the domain of industrial and petroleum oil regeneration, underpinned by an ethos of innovation and commitment to sustainability.

Our strategic foothold in the light industrial precinct of Yanbu Industrial City within the Kingdom of Saudi Arabia amplifies our market presence. With a product portfolio that spans across base oils, an assortment of solvents, and ancillary oil derivatives.

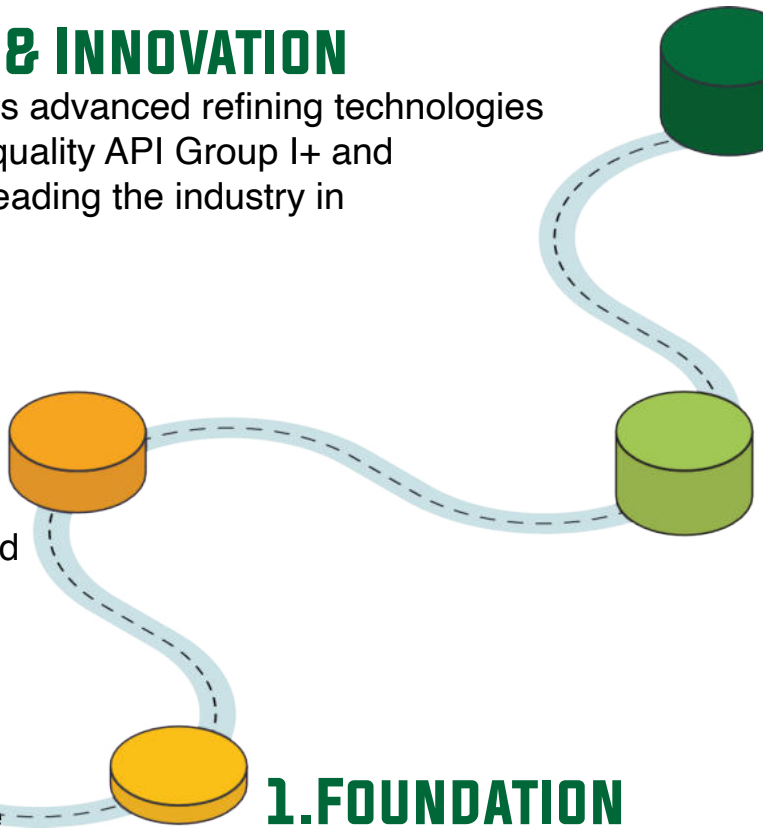

At **YUNIGREEN**, environmental conservation is not an afterthought; it's an integral part of our operational philosophy. As we spearhead advancements in our domain, we remain grounded in our commitment to stewarding a greener and more sustainable future for generations to come.

4.Evolution & Innovation

The company utilizes advanced refining technologies to deliver premium-quality API Group I+ and Group II base oils, leading the industry in the Middle East.

100% CIRCULAR BASE OIL

2.Global Markets Strategy

- The company **exports** base oils through Flexibags, ISO tanks, and bulk shipments, offering flexible logistics options to meet diverse customer needs.
- **Reach** registration in both the European Union and the United Kingdom ensures full compliance with international regulatory standards and smooth market access.

3.Expansion

The refinery is undergoing an upgrade to boost its used lubricating oil processing capacity from 170,000 MT to 270,000 MT per year by 2025

1.Foundation

Privately held independent company, family-owned in Saudi Arabia since1979

RECYCLING METRICS

+140,000
tons recycled
in 2024.

+180,000
tons annual recycling
capacity (2024).

MARKET LEADERSHIP

GLOBAL RECOGNITION

01 Largest Used Lubes Re-refinery in Saudi Arabia & the Middle East.

02 Among the top three re-refineries globally.

RECOGNITIONS & APPROVALS

01 A certified Saudi Authorized Economic Operator.

02 Enjoys preferred formalities with Saudi Customs.

03 Possesses export approvals for regions like the EU, East Africa, and West Africa.

ISO 9001: 2015 ISO 14001: 2015 ISO 14067: 2018 ISO 45001: 2018

TECHNOLOGICAL SERVICE ENHANCEMENTS

01 Integration of the SAP ERP system and other applications for streamlined management.

02 Utilized data analytics to provide enhanced market insights by discerning current oil consumption trends.

03 Mobile application serving 12,000+ Used Oil Generators.

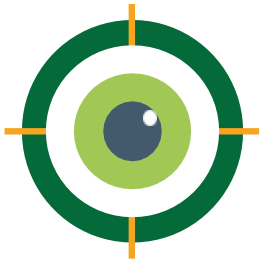

04 Call center operational 18 hours a day, 7 days a week

THE ROAD AHEAD: STRATEGIC DIRECTION 2026 – 2030

VISION

Pioneering Saudi Arabia's Green Revolution; Redefining Global Standards in Waste-to-Value.

MISSION

Rooted in our rich history of waste-to-value conversion, **YUNIGREEN** forges ahead by adapting to dynamic market shifts, employing cutting-edge processes, and expanding our reach. Our mission is to be a beacon of environmental stewardship, turning challenges into opportunities and ensuring a cleaner, more sustainable future for all.

COMPANY
OVERVIEW

YANBU INDUSTRIAL CITY REFINERY:

API Group I+

Re-Refined Base Oil
SN 300 Plus

Re-Refined Base Oil
SN 150 Plus

API Group II

Re-Refined Base Oil
N 150 N230

New Projects:

Saudi Arabia – Yanbu Industrial City
Base Oil API Group II and API Group II+ Hydro-treatment Refinery with Base Oil Capacity 61,000,000 USG/Y – Production startup expected during Q4-2028

Egypt – 6th October Industrial City
Base Oil API Group I Refinery with Capacity 40,000,000 USG/Y of ULO – Production startup expected during Q2-2027

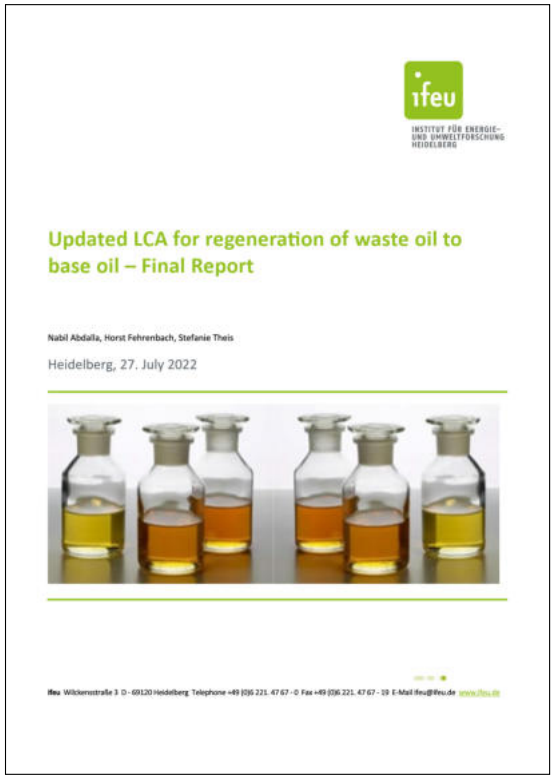

PRODUCT CARBON FOOTPRINT (PCF) OF RRBO

ifeu Study Of The Life Cycle Assessment For Regeneration of Wate Oil To Base Oil:

According to GEIR / ifeu 2022 LCA report LCA for regeneration of waste oil to base oil, The Greenhouse Gas (GHG) emissions for re-refining used lubricating oil are:

- **Average** burden (direct CO_2 emissions = 454 kg CO_2 per ton of waste oil processed (Range from 216 – 779 kg CO_2 –eq/t depending on technology).
- **Comparing** to virgin base oil production Group I, typically emits 1,200-1700 kg CO_2-eq per ton of base oil.
- **Re-refining** emits only 400 – 500 kg CO_2-eq per ton, reducing life cycle GHG emissions by about 60-75%.

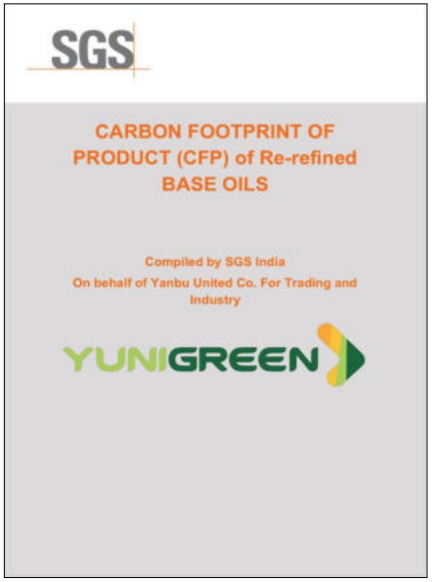

Process	CO_2 Emissions (kg CO_2-eq / t oil)	Relative Impact
Virgin Base Oil (Group I)	1,270 - 1,570	100%
Re-refining (Average)	450 +/- 200	25 - 35%
Net Saving	800 - 1,100 kg CO_2-eq / t oil	65 - 75% Lower

Yanbu United Company Study:

According to SGS study Carbon Footprint Of Product Of Re-refined Base Oil Produced in Yanbu United Company:

- **Every one ton** of re-refined base oil produced at YUNIGREEN emits about 0.45 – 0.5 t CO_2–eq / t Base Oil
- **SN 150** emits 0.46 CO_2–eq / t Base Oil
- **SN 300** emits 0.49 CO_2–eq / t Base Oil

USED LUBRICATING OIL COLLECTION

1. State-of-the-Art Oil Collection Sites

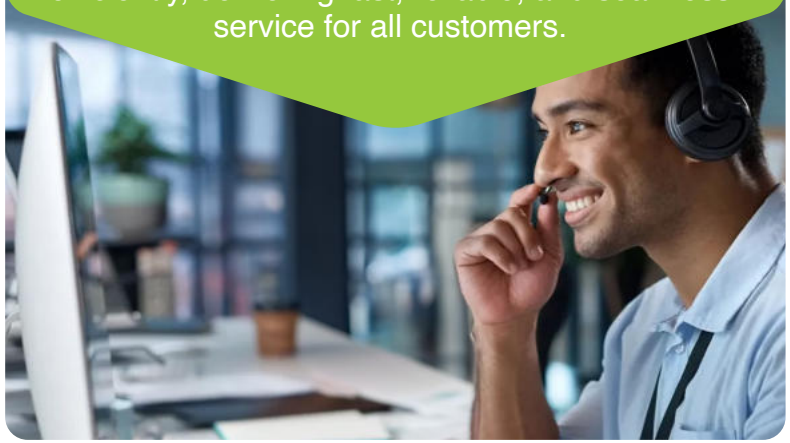

YUNIGREEN oil collection sites are developed in full compliance with international standards and local regulations, applying best practices and proven expertise. Each site is equipped with modern laboratories to ensure quality, safety, and environmental excellence at every stage of operation.

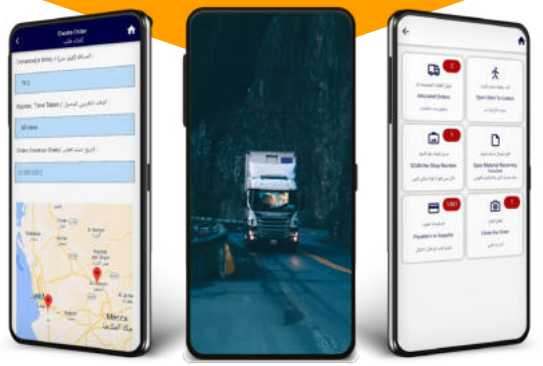

3. Dedicated Customer Service

YUNIGREEN specialized customer service team is ready to handle client calls, process oil collection requests, and manage contracts efficiently, delivering fast, reliable, and seamless service for all customers.

2. Smart Applications for Efficient Management

YUNIGREEN provides innovative smart applications to receive collection requests, digitally document transactions, and manage operations seamlessly, ensuring efficiency, transparency, and reliability throughout the process.

OIL COLLECTION CENTERS IN THE KINGDOM

DEVELOPING WASTE OIL COLLECTION POINTS

YUNIGREEN is in process of developing it's Twelve used oil collection points as per best practices in European countries and in compliance to the new Environmental regulations, with a total investment cost of SR 25,000,000.

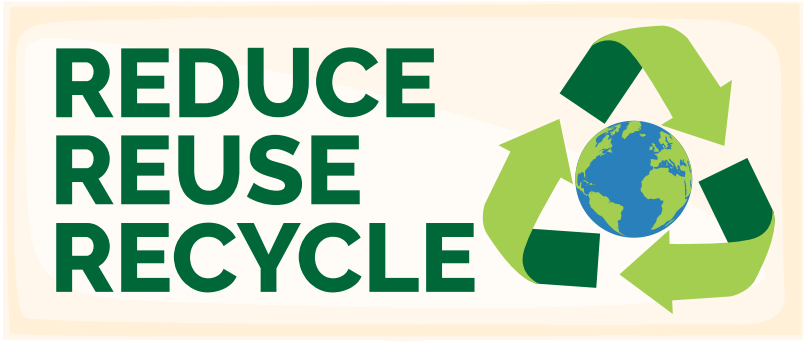

YUNIGREEN USED OIL COLLECTION MOBILE APPLICATION

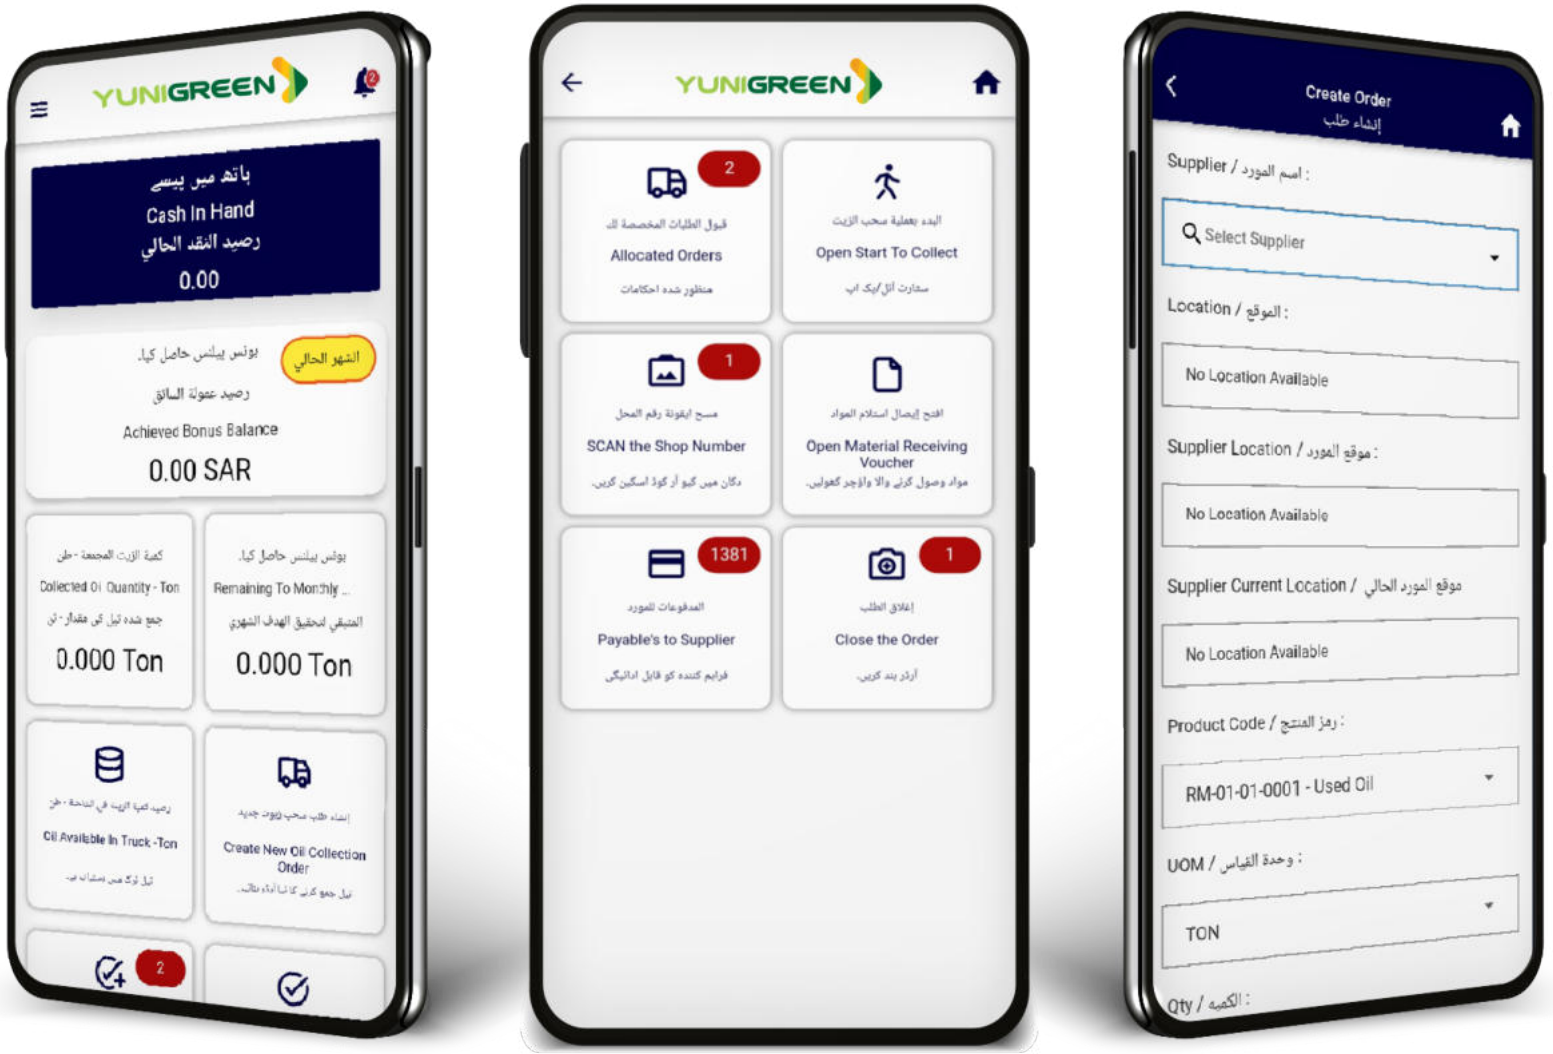

YUNIGREEN developed a mobile application to manage and control used oil collection operation, and increase logistic efficiency, improve used oil quality, and company market share of used oil.

The application includes the following:

- Driver Application
- Supplier / Waste Generator Application
- Field Representatives Application
- Used Oil Warehouse / Receiving Point Application
- Call Center / Admin Application
